

## Environment Policy Statement

---

Project Design Engineers Ltd (PDE) is a well-established premier Engineering, Design and Project Management Consultancy, with a highly regarded reputation for demonstrating expertise and consistent attention to detail across a wide range of projects and locations. PDE's multi-discipline project capability is supported fully by industry standard CAD and CAE systems, enabling PDE to provide a comprehensive engineering service from concept through to completion.

We understand that in the pursuance of our business activities we generate environmental aspects that impact on our local and global environment. It is our aim to identify and manage our environmental impacts through a systematic process to achieve our aims of long term business success within a sustainable environmental approach.

PDE aim to achieve the above by implementing an environmental management system that is registered against the international standard ISO 14001:2015. We aim to implement our environmental management system as part of an integrated process using risk based thinking that is compatible with the context and strategic direction of the company.

The PDE top management is committed to:

- Responsibly managing our environmental aspects to protect the environment and prevent pollution through our design process;
- Ensuring legal and regulatory requirements and our clients' requirements are identified, understood and consistently met;
- Identifying the environmental impacts and opportunities from our services and positively managing these to enhance environmental performance;
- Establishing objectives and targets within an environmental management framework of continual improvement;
- Continual development of the company environmental management system and providing adequate levels of resources to ensure it remains effective.

This Environmental Policy Statement has been signed and approved by the HSEQ Director. It will be displayed in PDE work locations and will be made available to all relevant interested parties upon request.

This policy will be reviewed for continuing suitability, adequacy and effectiveness at management review and will be communicated fully throughout the organisation.

A handwritten signature in black ink that reads "Patrick Kelly". The signature is written in a cursive style and is positioned above a horizontal line.

Patrick Kelly  
Health, Safety, Environmental and Quality (HSEQ) Director
